Vista Flip 3D Activator Crack + Free Download

Vista Flip 3D Activator is a very simple application designed to add a new feature to the famous Flip 3D feature, letting you enable it by moving the mouse cursor in a corner of the screen. Similar to the feature we've seen on Mac OS X, Vista Flip 3D Activator gives you the power to set up any corner of the screen to work with Flip 3D, while the application quietly sits in the System Tray. The interface is pretty simple and you should have no problem trying to figure out how to use it. You thus can choose either a single corner or multiple ones to use with Flip 3D and, additionally, you can also set up a mouse button to activate Flip 3D. Although it's supposed to run all the time and keep an icon in System Tray, Vista Flip 3D Activator is far from being a resource hog, running on very low resources. While it works quite okay on Windows Vista, there seem to be some compatibility issues with Windows 7 and users are highly recommended to use the program with administrator privileges to make it work flawlessly. Another issue we've discovered during our test concerns the mouse buttons you can configure to enable Flip 3D. While the middle mouse doesn't seem to be supported, Vista Flip 3D Activator lets you even set up the standard left or right mouse click to be used with the app, but none of them actually launch Flip 3D. Overall however, Vista Flip 3D Activator is quite a handy tool that helps you turn on Flip 3D whenever you want, just by moving the mouse cursor in a corner of the screen. It works quick and easy and has no negative impact on your system resources. Vista Flip 3D Activator - Key features: * Enable or disable Flip 3D

through the mouse cursor movements * Activate Flip 3D by clicking a corner of the screen with a button or by moving the mouse * Configure left, middle and right mouse buttons to be used with Flip 3D * Enable Flip 3D at startup * Configure the system to not load Flip 3D when Windows starts * Save and load the Flip 3D configuration * Save and load the Flip 3D configuration without to close and re-open the program * Minimize to tray when Flip 3D is active * Configure Flip 3D to be hidden on Windows restart * Configure Flip 3D to be enabled on Windows startup * Configure Flip 3D to be enabled when
