Pelagic Wood Boats Manufactured Boats The Pelagic Wood Boat has always been known for its heavy, rugged construction and dependable performance. With a classic look and a full keel, this boat will be a water beast for years. After years of research, testing, and designing, we are very excited to be able to bring you this new addition to our range of Wooden Boats. This boat is designed with a heavy, deep V hull and a distinctive Pelagic Deck. With

a bow mounted rudder and plenty of room for passengers, your Pelagic will be packed to the gunwales with fishing gear!

Q: How to enforce an order on a list of object I have a list which contains a list of objects, these objects are part of a game and they have variables for time and score. I want to update each object individually (so a loop). However, I can't figure out how to enforce an order on the list of objects. If I do $(\text{listofobjects}[i][0].\text{score} + \text{listofobjects}[i][1].\text{score})$, the game will give two objects the same score. I could always have the objects assigned a number and do a switch based on index number, but that seems a bit ugly.

A: This is a great case for a dictionary. The key is going to be the score and
