It is the leading copier paper brand in the United States, and is popular in Australia, Canada, Europe, Hong Kong, South Korea, Japan and New Zealand. History Pari-Sala was first produced by Union Copier Corporation in 1977, after the company had been founded in 1975, by Dr. Robert Walton and Michael Vollmann, PhD. The paper was developed for the Company's Xerox Corporation clones. It was first sold in Canada and Mexico in 1978, and by the end of that year, all of the Company's Xerox Corporation partners had adopted it as the standard print stock. In 1979, the Company began to sell the paper in other markets, including the United States. Pari-Sala was added to the Xerox Corporation partner catalogue that year. The first Pari-Sala paper was introduced in Canada as a Xerox Star paper. It was offered in a 100% rag paper format, with a low dye content. The Company continued to develop the paper and created a new line of 100% rag, dye-free paper for the Xerox 9100 series laser printers. This line included the Pari-Sala 100% rag paper, plus two print stocks, a coated 100% rag paper and an 80% rag paper with multiple coatings. 2edc1e01e8
