Nice review, but after upgrading to LR5.2 RC I think performance is better than with LR4. Working on a project with 1500 D800 NEFs my impression is that the smart previews increase speed while working in the Developer mode - in Lib. mode however everything slows because the JPEG previews are used. So far I am not sure how the Jpegs are used as previews when you have the smart previews (DNGs) available. But have to say that I am happy with 5.2 RC although I will say bye-bye to LR the day they make it part of CC.

This can include retouching or highly dramatic editing. Even a little use of photo-editing tools is good, but it has to be balanced with a degree of caution." - Charles Ruvald The Adobe Photoshop beta version 6 is set to be officially released on October 25, 2018. The beta version with a few bug fixes might be downloaded from Adobe's site and installed to test out the new features and some bugs.
