Committed to making the most innovative tools in the industry available for desktop, mobile and everywhere in between, the team at Adobe Photoshop is also continuously refining the tools to make it even easier to zoom, rotate, move, reshape and rotate back your artwork. These capabilities are designed to improve the way that artists and designers work and advance the industry, yet at the same time preserve the advanced level of control required from professionals. While some of the features may appear similar or sample-based, they're all accessible via plenty of handy shortcuts and unique, intuitive interface features. To keep up to speed with the latest Photoshop announcements, keep up with the @Adobe and Twitter and Facebook page. New and existing Photoshop customers can download Photoshop Creative Suite 6 (CS6) and CS6 Extended (CS6-EX) for free right now . While much of the 2014 MAX keynote products were powered by Adobe Lightroom, today's announcements are all focused on desktop applications – specifically Photoshop on the desktop. Photoshop for the Web and Adobe Clipstudio are currently available on the web, but today's announcements are for Photoshop

desktop in future web browsers.

"Personal Editing for everyone, and Everywhere" is the new Photoshop mantra. For example, hand-held devices or quick image editing from the desktop have never been so easy, and Photoshop for the web offers an easy, collaborative online editing experience, and even supports editing tasks in the browser. Just as with the upcoming beta release of Share for Review, any change you make in Photoshop on the web stays in the browser; no work is sent back to the desktop at the end of your collaborative editing session.
